 **Open to GTM Engineer & Outbound Specialist roles**

Former teacher turned GTM Engineer. I build Clay-powered outbound systems that find the right buyers, reach them at the right time, and fill pipelines consistently.

● Experience

GTM Engineer, 7x GTM

February 2026 – Present

- Own end-to-end outbound campaign management: ICP definition, list building, enrichment, qualification, copy review, infrastructure setup, launch, and monitoring
- Manage positive replies and personalised follow-ups, converting conversations into booked meetings
- Run content operations for 7x GTM: LinkedIn post discovery, Canva graphics, scheduling, and brand consistency
- Build internal tools and automations (Clay, Google Apps Script, Claude Artifacts), including a custom CRM and an AI prospect-research agent
- Designed, built, and shipped a full interactive portfolio site end-to-end using Claude Code

● Selected Client Campaigns

Naabu AI

AI Agent Platform

- Built targeted prospect lists from scratch and wrote full cold email copy and messaging sequences
- Set up complete campaign infrastructure; configured and launched sending sequences

Lumie Studio

Fractional Salesforce & Email Marketing

- Defined targeting and ICP criteria; wrote outbound copy end-to-end
- Built campaign infrastructure from the ground up; launched and managed the live campaign

● Skills & Tools

● AI DEVELOPMENT

Claude Code, Claude Artifacts

● LIST BUILDING & ICP

AI Ark, Serper.dev, Apify

● DATA ORCHESTRATION & VALIDATION

Clay, Prospeo, BetterContact, MillionVerifier, BounceBan

● SEQUENCING

Smartlead, Instantly, HeyReach

● AUTOMATION

Google Apps Script, Slack Webhooks, n8n, Notion

● CONTENT & DESIGN

Cold Email Copywriting, LinkedIn Content, Spintax, Canva

● Core Strengths

Technical Precision

Lists that are actually clean, qualified, and ready to send.

Campaign Thinking

Understands the full outbound system, not just list-building in isolation.

Fast Learner

Attendance registers to Clay workflows in six months, self-taught.
